Introduction

Memecoins have evolved beyond simple digital assets, becoming cultural phenomena that capture the imagination of the crypto world. MOKA MOKA builds on this trend, offering not just a token but a platform to interact, create, and earn. With a robust roadmap and a focus on community engagement, MOKA MOKA seeks to combine the fun of memes with cutting-edge blockchain technology.

Ecosystem Features

1. Telegram-Based Game

MOKA introduces a Telegram game that allows users to claim rewards and interact within the ecosystem. Built on Layer 2 technology and leveraging the TON blockchain, the game ensures low fees and fast transactions.

- Players can complete tasks, claim rewards, and compete for leaderboard positions.
- Support for EVM-compatible blockchains expands accessibility for a broader audience.

Ecosystem Features

2. QR Code NFT Project

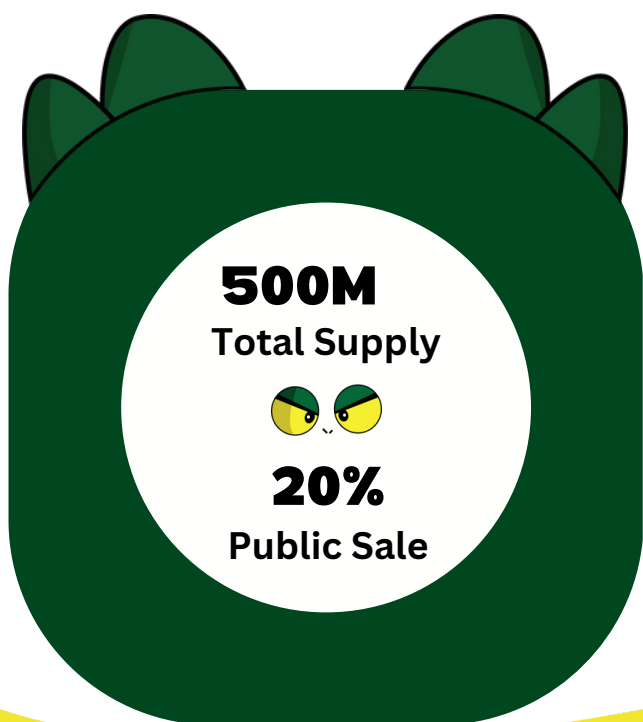

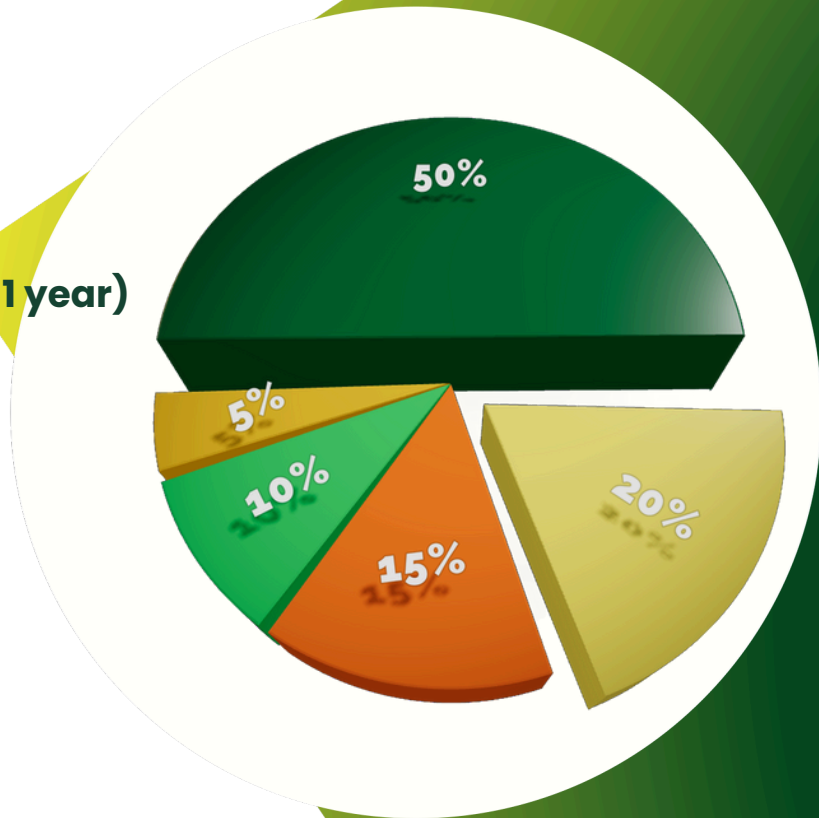

MOKA MOKA's NFT initiative allows users to create custom NFTs embedded with QR codes. This innovative feature introduces an entirely new way of minting and sharing digital collectibles.

- Limited Supply: Users can set a cap on the number of NFTs available.
- Mint by Scanning: Sharing the QR code allows others to scan and mint the NFT directly.
- Tradeable Assets: Minted NFTs can be traded on supported marketplaces, creating an engaging loop for creators and collectors.

Tokenomics

Here's a revised tokenomics breakdown based on a supply of 1,000,000,000,000 MOKA MOKA tokens,

- 50% Presale and Liquidity Pool
- 20% Team & Advisors (locked for 1 year)
- 15% Marketing & Community
- 10% Partnerships & Ecosystem
- 5% Development Fund
